

Desktop

Redact. Review.
Release.

RapidRedact Desktop is a fast, easy to use redaction tool for irreversibly removing selected information from all electronic document types. The software completely removes text marked for redaction, any record of text or author's changes and cleans hidden data from "behind" the document. Once redacted, it's as if the information never existed.

Who uses RapidRedact Desktop?

Businesses

Automatically search and redact personal identifying information such as social security numbers, credit card numbers, names, etc. Review the redactions and make further changes using manual redaction tools.

Users

- Clerks & Court Officials
- Litigation support companies
- Law firms
- Compliance departments
- HR and personnel departments
- Health & medical records
- Education & student records

Integrators

- In-house redaction development
- Bureaux redaction services
- Solution providers and business support services

RapidRedact works with most document types

- Microsoft Word documents
- PDF Documents
- Outlook emails and attachments
- Excel spreadsheets
- Image formats such as TIFF, GIF and JPEG
- Web pages
- Scanned documents
- Any document that can be printed

Redact . . . Review . . . Release
As simple as that.
